Verizon messages plus app not working

Message+ is a program developed by Verizon technologies. This app allows the user to sync all their text messages on compatible devices. It allows the user to make and receive calls, send gift cards or customize chat. It is a very useful program used by many people. But quite recently there have been many reports where users can not use this application and it does not send or receive text messages. Verizon's Message Plus program

What is preventing Message+ from working on Verizon? After receiving many reports from several users, we decided to take a look at the situation and compiled a few solutions after experimentation. We also looked over at the causes that could cause this problem and listed them as follows. Cache: Some data is cached by applications to reduce load times and to provide a better and smoother experience. However, over time, this cache may be corrupted that may end up sabotaging the functionality of the application and triggering this error. Default messaging application: The default application integrated into the operating system on your phone may end up sabotaging the Message+ app by Verizon. It can prevent some features in the app from working or even prevent it from loading completely. Now that you have a basic understanding of the nature of the problem, we will move towards the solution. Be sure to implement these in the specific order in which they are presented to avoid conflict. Solution 1: Clear cache

In this step, we will remove the cached data for some applications integrated into the work of the message+ app. To do so: Drag down the notification panel and click Settings cog. By clicking the Click down settings button and selecting the Apps option. Click appsClick the Default messages app and select the Storage option. Tap the save optionSelect the Clear Cache button to clean out the cached data. Repeat this process for the Messages+, Phone(Dialing) and Contacts applications. Check if the problem persists. Solution 2: Change permissions

Sometimes, the store mail messaging app can draw over the message+ app and prevent it from working properly. Therefore, in this step, we will adjust the permissions allowing the message+ app to work properly. To do so: Drag down the notification panel and click the Settings gear. By clicking the Click down settings button and selecting the Apps option. Click the Default Messages app and click the Permissions option. By clicking the Permissions optionCheck all the permissions granted to the application. Navigate back to the Apps section and click the Messages+ app. Click Permissions and turn off permissions for Notifications, MMS, and Wifi. Navigate back to the Apps section and click Three Dots in the top corner. Select Special access and select Write system settingsClick Write system settings Note: Depending on the user interface, there may be a More option instead of the Special Access one. Click the Default Messages app and turn off the toggle. Restart your device by pressing the power button. Wait for the device to restart and check if the problem persists. If you're using a messaging app on your Android phone, you may encounter a common issue where messages no longer work. Fortunately, this type of problem can usually be solved quickly as well. Here's what to do to solve the problem if messages suddenly stop on your Android smartphone. On the Start screen, tap Settings menu. Scroll down, then tap App option. Then scroll down in the menu and tap on the Message app in the menu and tap on the Decon tap the Storage option. You should see two options; Clear data and clear the cache. Tap both. Hopefully, this simple procedure will help solve any messaging problems on your Android phone. Did this method work for you? Let us know in the comments! « Previous Next » There is no monthly subscription fee or cost to download verizon messages (Message +) app from the app store on your device or computer.* Messages you send and receive with Verizon Messages (Message +) over the Verizon network or a Wi-Fi network will count towards your smartphone's messaging plan. Messages that are synced to and from a tablet via a Wi-Fi network do not incur data charges. *Data charges may apply for downloading and using certain features according to your data plan. Data charges may also apply to synchronizing messages between your devices. Downloading Verizon Messages (Message+) requires approximately 30 MB of data. Anyone with a valid U.S. mobile number can use Verizon Messages (Message+), including non-Verizon customers. Verizon Messages (Message+) is compatible with: Mobile devices running: Android™ 4.2 and later iOS 7 and later computers* running: Windows® 8 in desktop mode Windows 10 OS X 10.8 and later browsers such as: Internet Explorer® Safari® Chrome™ Firefox® Download Verizon Messages (Message+)* Certain features are not available for desktop messages. Public profiles let all Verizon Messages (Message+) users, including those not in your contacts, see your name and avatar. You can edit, delete, or bypass the public profile feature at any time by going to the sidebar menu. Group chat allows you to add or remove members, assign admins to the group, add avatar and background, and more. A group can have up to 250 participants. You can create a group chat by tapping the Pencil icon. By creating a new group, you can customize the conversation for that group with a unique background, avatar, and name. You can also make this the default setting for all group messages by updating the group conversations settings. Note: If you switch to a messaging app other than Verizon Messages (Message+), you do not have access to your group chats. When driving mode is turned on, the Verizon Messages (Message+) app turns off incoming incoming and pop-up message notifications and send an automatic reply message, and say you're running, and you'll reply later. The automatic reply message can be edited or disabled in the driving mode settings. Driving mode is only available in Verizon Messages (Message+) for Android at this time. If you turn on Auto-Glympse in your app's settings, your location will automatically be shared with anyone in the auto-glympse contacts whitelist if they let you know while driving mode is turned on. See Driving safety in the terms and conditions for more information. Learn how to use Driving Mode on Android Glympse is a way to share your location in real time on a map in a conversation. You can choose who can see you and for how long. Visit the Glympse.com for more information. You can turn on driving mode and Auto-Glympse in the app's settings. Then your location is automatically shared with everyone on your whitelist of Auto-Glympse contacts and messages you're on while driving mode is on. See Location in the terms and conditions for more information. Learn how to: Send a Glympse on Android Send a Glympse on Apple Verizon Messages (Message+) integrates with Yelp so you can quickly plan with your friends where and when to show up. Find a Yelp location, and then share your opening hours and directions through the Verizon Messages (Message+) Yelp feature. It also estimates the arrival time for both parties. Beta Lab lets you explore cutting-edge features and provide feedback as we work to create new, innovative ways to communicate. Yes, you can schedule messages to be sent at a specific date and time up to one year later. If you schedule a message to be sent at a later date, we save the unsent message to the scheduled delivery date and for up to 90 days after delivery. Learn how to: Use message scheduling on Android Use message scheduling on Apple Calling on Verizon Messages (Message+) lets you make and receive voice or video calls on your tablet, and voice calls from compatible smartwatches, all of which use your smartphone's mobile number. They can be done over Wi-Fi or your cellular network. You can call from secondary devices to North American numbers (that is, calls to a country code of 1). For more information, go to the Call FAQ on Verizon Messages (Message+). Verizon Messages (Message+) supports most Verizon Android and Apple® phones and tablets. To check if your phone or tablet is supported. Open the app store on your device (ex: Play Store, App Store, etc.). Tap the Search field. Enter Verizon Messages. If Verizon Messages or Message+ is listed in search results, your device is supported. If one of these isn't listed, the app won't be supported on your device. If your device is not supported, check again later. Support for multiple new and existing entities is added regularly. With Verizon Messages (Message+), you can: Set a profile picture or avatar Take and send selfies Edit and Videos Customize photos photos Sketches, captions, or collages Use Canvases to add stickers, doodles, or text to an image Customize call backgrounds, bubble styles, and font Set automatic reply messages Set a signature Note: Not all features are available on all OS or versions of Verizon (Message+). Learn how to: In the Group conversations section of settings, find a Use MMS to start a group conversation box. If you select or clear this check box, you change how you start a group conversation: When this check box is not selected – Each time you send a message to multiple contacts, you are prompted to create a new improved group that includes everyone in the To field. You can then name the group, edit the group participant list, and customize the group with a unique background and avatar. With this check box checked - You are not prompted to create and name the group when you send a message to multiple contacts. It will be sent as a traditional multimedia message. To create an improved group that you can customize, you must create the group first, and then send a message to the group. Verizon Messages (Message+) can be the default Messaging app on many Verizon Android devices. On some devices, it doesn't replace the original text app. You can switch between the original caption app on your phone and Verizon Messages (Message+). Messages sent or received in one app will also appear in the other app. Depending on your notification settings, you can receive duplicate notifications or only receive notifications from one app. In addition, there may be differences in functionality that affect the messaging experience (e.g. on some devices, if you use the original app to send a group message to your iPhone® it can change the thread from group MMS to mass text). We recommend that you choose a primary messaging app, instead of skipping back and forth No. Verizon Messages (Message+) uses your device's address book and contact list. It does not generate a unique address book. To improve your messaging experience, you can use Verizon Cloud to back up all contacts from your primary smartphone to Verizon Cloud. This will allow your contacts to sync in Verizon Messages (Message+) on any device or online. Yes, you can download and use Verizon Messages (Message+) on a compatible device or computer. You can sync your mobile number with the web and up to five additional devices. Some features are not available on a computer. Integrated messages are a service that works with Verizon Messages (Message+) to let you send and receive text and multimedia messages seamlessly on your smartphone, tablet, computer, or web using your Verizon mobile number. The service syncs up to 90 days with messages across your devices. You can use Verizon Messages (Message+) to send and receive messages without the Integrated Messages service. To use Verizon Messages without the multi-device sync feature, you can simply unsubscribe from integrated messages. However, if you want to access the from a device other than your primary phone, such as your tablet or computer, you must subscribe to Integrated Messages. For more information, see Retention of messages in the terms and conditions. Using the Verizon Messages (Message+) app on your phone, tablet, computer, or web, you will automatically subscribe to the integrated messaging service. You can also sign up for Integrated Messages online by signing in to My Verizon from the My Messages page and clicking Go to Web App. If you have subscribed to the service, you can re-subscribe at any time. To opt out of integrated messages: Tap the Menu icon in the Verizon Messages (Messages+) app. Tap Account. Tap Delete my account. Enter your phone number and tap DELETE ACCOUNT. Note: This is a permanent process and cannot be undone. Scroll to and tap Unsubscribe. Your account is deleted and you can continue to use the Verizon Messages (Message+) app without the integrated messaging service. However, if you want to access your messages from a device other than your primary phone, such as your tablet or computer, you'll need to subscribe to Integrated Messages. Yes, most business accounts are eligible to use integrated messages and can subscribe to this service. Note: Integrated messages with Verizon Messages (Message+) are not designed for the secure transfer or storage of personal health information. Therefore, it must not be used to store or transfer Protected Health Information (PHI) as defined in the Health Insurance Portability & Accountability Act of 1996 and the Health Information Technology for Economic and Clinical Health Act of 2009 and associated regulations (overall HIPAA). To ensure that your messages are synced across your devices, we store the messages you store on your devices for up to 90 days. When you delete a message from one device, we delete it from our servers and also from your other devices. This synchronization process may not be instantaneous. If you no longer want to use integrated messages on any device, unsubscribe from integrated messages to prevent it from syncing and saving your messages. If you delete the Verizon Messages (Message+) app from one device or switch to another messaging app, even the default messaging app on your device, the storage of messages won't stop. For more information, see Retention of messages in the terms and conditions. No, integrated messages with Verizon Messages (Message+) are not designed for the secure transfer or storage of personal health information. Therefore, it must not be used to store or transfer Protected Health Information (PHI) as defined in the Health Insurance Portability & Accountability Act of 1996 and the Health Information Technology for Economic and Clinical Health Act of 2009 and associated regulations (overall HIPAA). If you are a covered entity or account that of HIPAA, do not use integrated messages to store or transfer if your business is a covered entity or account as defined by HIPAA, or otherwise doesn't want users to store messages in the cloud, an authorized delegate must block integrated messages. To learn more about HIPAA, visit . See HIPAA in the terms and conditions for more information. You can send messages from both your phone and your connected device, but not all messages are synced. You may experience limitations with certain features, such as sent messages, read status, and deletions. For better sync results, use Verizon Messages (Message+) on both devices. Yes, see the following guides to set up Palm or a tablet on your account. Note: Messages start syncing on the day you sign up for Integrated Messages. All messages you sent before you signed up for the service are not synchronized. The integrated messaging service syncs up to 90 days of messages between the web and iPhone, tablet or other devices. Messages older than 90 days remain on your phone but don't sync to the web. For more information, see Retention of messages in the terms and conditions. No, each Palm or tablet can only sync with a single phone number at a time through Verizon Messages. To switch your palm (connected device) or tablet to a new phone number, you'll need to remove the device from the list of synced devices for your old number. You can then add the device to the synced devices for the new number. You can have multiple devices connected to a single phone number. Messages sent via Verizon Messages (Message+) are billed just as they would be with other messaging apps. If you have an unlimited messaging schedule: You won't be charged extra for messages sent or received with Verizon Messages (Message+). However, some features will use data according to your data plan. If you haven't subscribed to a messaging plan: You'll be charged standard pay while walking pricing for text messages and multimedia messages. If you're on a business account with a text plan only: You'll be billed for multimedia messages at standard prices. See Costs in the terms and conditions for more information. Individual text messages are billed as text messages. All other messages are billed as multimedia messages. Each attachment (e.g. image, video, etc.) that is less than 5 MB is billed as a single multimedia message. Messages with attachments over 5 MB and certain other features will incur data costs according to your data plan. eGift cards are billed based on the value of the eGift card selected. Standard multimedia message rates apply to the sender and recipient of the eGift card. See Costs in the terms and conditions for more information. No, you will only be charged once according to the message schedule when you send or receive a message. You charged the same rate per message per recipient, regardless of whether you send the message message tablet, computer, or other device. See Costs in the terms and conditions for more information. Data charges may apply when you download and use certain features of Verizon Messages (Message+). If you have Verizon service: Sending and receiving text messages (including photos, audio, video under 5 MB, etc.) will be billed according to your message quota, not your data quota. Use of other features, including the following, counts towards your data quota (unless you use Wi-Fi): Sending and receiving videos over 5 MB of Glympse messages Yahoo seeks locations at Yelp Gifting Image preview Calls on linked secondary devices using integrated calls (such as your watch or tablet) Canvas Photos/Editing, administrative features, including (auto-reply, muted/unindicted calls, scheduled messages, updating group details, and public profile updates) If you are not a Verizon customer: You are billed under your own provider's message and data plans. You'll be billed to data rates for sending and receiving attachments that are 5 MB or greater (unless you're on Wi-Fi), according to your Verizon message and data plans or wireless provider. When you use Verizon Messages (Message+) outside the United States, global data costs apply. Yes, you can use Verizon Messages (Message+) while you're in another country using Wi-Fi, mobile data, or a roaming network. Verizon Messages (Message+) 5.0 and later prefer Wi-Fi when roaming and then mobile data if Wi-Fi is not available. Local messaging rates apply when you use Wi-Fi or mobile data. In addition, international data roaming fees will apply when using mobile data. International roaming networks will be used when Wi-Fi or mobile data is not available. International message prices apply. See Costs in the terms and conditions for more information. You can attach an eGift card from Verizon Messages (Message+) and send it to any U.S. mobile phone that can receive photo and video messages. The formatted eGift card will be delivered as an image message. The recipient can use the barcode in the store, or add the value of the eGift card to an existing gift card or to the company's mobile app. Note: If you registered after 3/20/18, eGift cards will not be available for purchase via secondary devices. We offer gift cards from multiple sellers through the Verizon Messages (Message+) app, and the list continues to grow. Tap the eGift icon in the Verizon Messages (Message+) app to see a list of available gift cards. You can transfer the balance on the eGift card by copying the card number and PIN included with the eGift card to an existing card app. This can be done online, in the app or in most trading locations. You can buy eGifts in Verizon Messages (Message+) 2 ways: Credit cards - All major credit cards are accepted, as well as Visa® Debit and MasterCard® Debit Cards. Consumption limits may vary depending on eGift you or on other: There is no limit to the number of credit cards you can add to your account, but this activity is monitored to prevent fraud. Charge for your Verizon account - Each line on your account can spend a maximum of \$100/month. Orders will be displayed at next month's bill*. Learn how: Send an eGift on Android Send an eGift on Apple See Gift Card Purchases in the Terms and Conditions for more information. *Web purchase requirements, gifted rights and limit requirements apply. The PIN is used to protect your account from unauthorized purchases. Because you don't need to enter your card information when using a saved card, we use your PIN to verify your identity. Learn how: Reset your PIN on Android Reset your PIN on Apple If you enter the wrong PIN five times, you'll be locked out from accessing your saved credit cards and you'll need to reset your PIN. If you forget your credit card PIN, you won't be able to send eGifts with a saved credit card. You'll need to remove all your saved credit cards and then add them back on. You can create a new PIN when you add your credit card again. Learn how: Reset your credit card pin on Android Reset your credit card pin on Apple You can resend the same eGift card to the person if they accidentally delete their. To reassign an eGift: Reopen the message conversation with the person you're re-sending eGift to. Tap the three dots on the eGift you sent and tap Send eGift card again. You've succeeded in resending an eGift. Yes, to give away an eGift given to you: Tap the eGift tab at the top to see eGifts. Find the eGift you want to give to someone else and tap the three dots in the top right corner. Tap Send to a friend. Enter the mobile number or email address you want to send eGift to. Tap Send. You've given your eGift to someone else. Yes, you can buy and send data as a gift to another Verizon Wireless customer. Learn more about data gift, including how to use it. Verizon will use location information collected from Message+ and other apps to better personalize customer experiences, including advertising, and to develop new location-based features and services. When you allow, we collect information about cellular, Wi-Fi, Bluetooth, GPS and sensor (gyroscope, accelerometer, light, magnetometer and pressure). Collection of location information for Verizon purposes is completely optional in Message+. You give permission when prompted in the app. If you decide you don't want Verizon to collect and use this information, you can still use the app and all location-based features in the app, such as Glympse and Yelp. You can change your selection at any time via the App Settings page by toggle the Verizon location data collection setting. Yes, if you accept it, the location will be collected even when the app is not in use. No, not in a way that identifies individual users, may share certain identifiable information with third parties in order to for purposes, such as traffic reporting. We do not sell, rent or share accurate location data that identifies you with others for their own purposes. To use Message+, you can find it by swiping right on the Start screen. After you open the Message+ app, you can set it as the default messaging app when prompted. If you used Verizon Messages (Message+) on your old phone, you may not see previous messages in the default messaging app on your new Samsung phone. You can transfer your messages using the Samsung Smart Switch app. Or you can open Verizon Messages (Message+) on your new phone and select Recover messages from the web to access your messages from the last 90 days. If you used Verizon Messages (Message+) on your old phone, you may not receive your group messages on your new phone if Samsung Messages is set as the default messaging app. To access the group messages, swipe right on the Start screen and open the Message+ app. When prompted, set Verizon Messages (Message+) as the default messaging app. Once you've done that, the group messages should start coming through again. Messages start syncing the day you sign up for the Integrated Messages service. All messages you sent before you signed up for the service are not synchronized. This synchronization process may not be instantaneous. The integrated messaging service syncs up to 90 days with messages to the web and Palm (connected device), tablet, or other device. Messages older than 90 days remain on your phone but don't sync to the web. For more information, see Retention of messages in the terms and conditions. Yes, with Verizon Messages (Message+), you can save your messages to an external SD card and restore them later. Note: Many newer devices are not automatically stored on the external SD card. However, you can change the default directory where messages are stored on the external SD card. Yes, you can recover messages on Android devices synced with Verizon Messages (Message+) within the last 90 days. Data usage applies unless you are connected to a Wi-Fi network. Recovering from the web may take some time if you have many messages to recover. To make all your messages available in Verizon Messages (Message+), you'll need to turn off Message+.
